

MUHAMMAD ZULKIF

WordPress & AI-Assisted Web Developer

Peshawar, Pakistan • +92 333 8329298 • muhammadzulkif2001@gmail.com • zulkif.site

SUMMARY

WordPress and web developer with 2+ years of experience delivering multilingual (English, French, Danish) websites and custom software for NGOs, businesses, and international clients. Delivered 22+ websites and 8 custom software solutions using WordPress, Elementor, JetEngine, PHP, and Tailwind CSS, combining hands-on engineering with AI-assisted development to ship faster without sacrificing quality.

WORK EXPERIENCE

WordPress Developer

Nov 2024 – Present

Zouetech

- Delivered 14+ WordPress websites and 6+ custom client projects spanning service, LMS, healthcare, and WooCommerce platforms.
- Designed and built custom dashboards, booking systems, and management tools in PHP and Tailwind CSS, using AI-assisted development (Cursor, Antigravity) to cut delivery time.
- Built Zouetech's internal project management software from the ground up — design, development, and full functionality.
- Owned hosting, deployments, and migrations across SiteGround, Hostinger, and Cloudflare for all client and internal projects.

System & IT Manager

Feb 2024 – Mar 2026

Dosti Welfare Organization

- Managed and developed organizational websites — Dosti, DPLF, and WPLF — on WordPress, plus full site management for partner org Global Education Campaign.
- Independently architected and built a Project Management System, Voucher Management System, and Donation Tracking System using PHP, MySQL, and Tailwind CSS.
- Ran digital outreach — email marketing, WhatsApp API campaigns, and social content design — to grow community engagement.
- Owned end-to-end IT operations: hosting, domains, security, database optimization, and technical support.

Cashier & Data Entry

May 2022 – Apr 2023

Smart Care Pharmacy & Mart

- Processed cash transactions and POS operations with 100% financial accuracy.
- Maintained accurate, up-to-date inventory records and daily sales reports.

SELECTED PROJECTS

Home Services Booking Platform

Built a full booking platform from scratch for a home-services business, letting customers book electricians, plumbers, painters, and other professionals through a multi-step flow with zone-based staff assignment and live availability. Designed the admin dashboard, MySQL schema, and REST APIs that power a companion mobile app, plus automated email notifications and a Kanban order-tracking board. Handled the entire build solo — frontend, backend, testing, and deployment. Stack: PHP, MySQL, JavaScript, Bootstrap.

Donor & Voucher Management System — Dosti Welfare Organization

Digitized Dosti's donation operations with a platform to manage donors, issue and redeem vouchers, track donation boxes and collection visits, and coordinate restaurant partners — all from one dashboard. Added a dedicated restaurant partner portal, role-based access control, SMTP email campaigns with open/click tracking, and Excel/PDF reporting. Owned UI/UX, database design, and deployment end-to-end. Stack: PHP, MySQL, Tailwind CSS, AJAX.

Enterprise Project Management System — Zouetech

Customized and extended an existing PMS to fit Zouetech's internal workflow — added new modules, reworked the database, and rebuilt role-based dashboards for admins, department heads, and employees. Delivered attendance tracking, performance monitoring, team chat with notifications, and converted the app into a Progressive Web App. Stack: PHP, MySQL, JavaScript, Bootstrap, PWA.

Project Management System — Dosti Welfare Organization

Designed and built a separate PMS for Dosti from the ground up, covering project/task assignment, approval workflows, team chat with file sharing, calendar management, and performance tracking across role-based dashboards. Shipped as a Progressive Web App for a seamless desktop and mobile experience. Handled UI/UX, database architecture, and deployment independently. Stack: PHP, MySQL, JavaScript, Bootstrap, PWA.

Afghan Oxygen Supply — Business Management System

Replaced a client's manual paperwork and spreadsheets with a full business management system covering customer records, cylinder refill orders, supplier transactions, cash book, ledgers, and financial reporting — built with English and Pashto (RTL) language support. Stack: PHP, MySQL, JavaScript.

SKILLS

WordPress & Backend: Custom theme & plugin development, PHP (Actions/Filters hooks), ACF, JetEngine, Custom Post Types, Elementor Pro (Figma/PSD to WordPress), WooCommerce, REST API & third-party integrations, MySQL, website migration, cPanel/hosting, SSL configuration

Technology: HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, PHP, MYSQL

E-Commerce & CMS: WooCommerce, Shopify (store setup, theming, product management, app integration)

AI-Assisted Development: Cursor, Antigravity, Stitch, Lovable, ChatGPT, Claude — used for rapid prototyping and faster shipping

Design & Marketing: Adobe Illustrator, Canva, UI asset creation, Facebook & TikTok Ads, email marketing, WhatsApp API campaigns

Productivity: MS Excel, Word, PowerPoint, 40 WPM typing

EDUCATION

Bachelor's in Computer Science — 3.0 CGPA	Oct 2023
Diploma in Information Technology	2019
